

A COIN Case Study

# The COIN Effect: Earn XYO then Watch it Grow

# Meet the COIN users who transformed their lives

In September 2024, XYO's price reached a low of approximately \$0.0034. By December 3rd 2024, it surged to around \$0.04419, a 1200% increase.\*

This means that for the 7,000+ COIN users who redeemed more than \$200,000 worth of XYO in September, their earnings were collectively worth over \$2,400,000 at the December peak.

This substantial growth enabled COIN users to move closer towards their financial goals through their engagement with COIN.

I have been using the COIN app for less than six months, and it's been an incredible experience. Recently, thanks to XYO's price increase, I sold my XYOs and was able to achieve a few of my smaller financial goals—like buying a new bike! It's amazing how such a simple app has made a tangible impact on my everyday life, and I'm excited to see where it takes me next.

# XYO 2024

Discover how the demand for decentralized tech fueled XYO's rise, transforming everyday actions into meaningful rewards for COIN users.

# The XYO Token

Since its launch in 2018, XYO has become the most popular redemption item in the COIN app, offering users an exciting gateway into blockchain and crypto. Despite navigating multiple crypto bear markets, XYO has proven resilient, with massive surges in value that have transformed even small COIN redemptions into major financial opportunities.

In late 2024, thousands of COIN users who redeemed their rewards for XYO saw incredible gains during a dramatic value spike. This wasn't the first time a surge like this occurred. For many, this wasn't just about financial success—it was their first step into the world of blockchain, with XYO sparking curiosity and unlocking new possibilities.

XYO's recurring success underscores the potential of the COIN ecosystem, showing how everyday engagement can lead to extraordinary outcomes for its community around the world.

# XYO and the Crypto Market in 2024

The crypto market in late 2024 saw significant growth after years of slow recovery following the 2022-2023 bear market. As global awareness of decentralized finance (DeFi) and blockchain technology grew, tokens with strong use cases—like XYO—gained renewed interest from investors and users alike.

For COIN users, the XYO price jump provided an opportunity to see the value of their everyday efforts skyrocket.

What started as simple Geomining or completing Rewarded Tasks turned into a chance to achieve financial milestones.

# real growth

COIN is more than an app—it's a gateway to financial empowerment through cryptocurrency.

By turning everyday activities into opportunities to earn, COIN provides a clear, accessible path for users to grow their digital assets and achieve real-world milestones.

What sets COIN apart is its ability to make crypto earning simple, engaging, and transformative, regardless of a user's background or technical expertise.

# 1. Accessible Earning Opportunities

COIN's innovative Geomining technology allows users to earn crypto rewards by validating geospatial location data. Whether you're walking, driving, or commuting, COIN transforms routine actions into opportunities for growth. This makes cryptocurrency accessible to anyone, eliminating the barriers of high costs or technical complexity that often deter newcomers.

## 2. Diverse Earning Methods

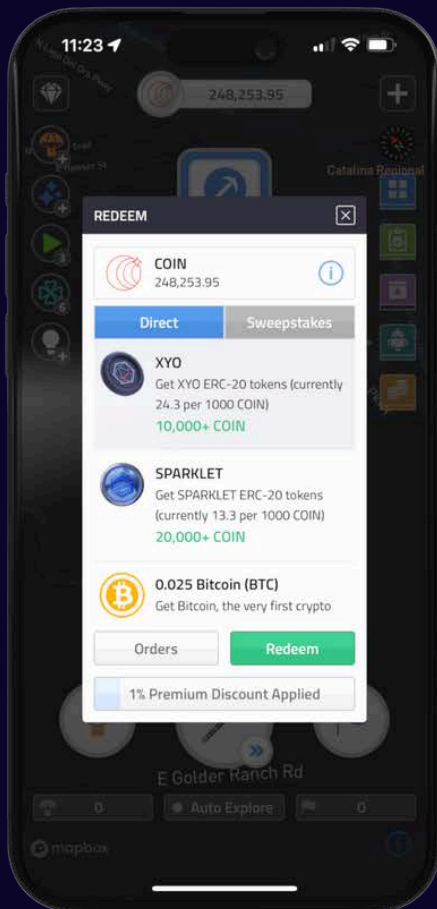

COIN doesn't stop at Geomining. Users can earn through surveys, interactive games, special offers, and more. These gamified experiences not only make earning enjoyable but also maximize rewards. The app integrates seamlessly into users' lifestyles, offering multiple ways to grow their earnings.

### 3. A Unique Ecosystem for Growth

COIN's integration with tools like SentinelX devices further amplifies user rewards. These devices enhance Geomining efficiency, enabling users to earn more without additional effort. For users who choose to redeem for XYO and hold their earnings, the recent surge in XYO's value demonstrated the potential for significant portfolio growth.

### 4. Real Crypto Conversion

Unlike other platforms, COIN offers the ability to redeem COIN for cryptocurrencies like XYO. This conversion process empowers users to see the tangible value of their efforts, transforming earned rewards into assets that can grow over time.

# The Result: Real Growth, Real Impact

COIN is the only platform of its kind that combines everyday actions with blockchain technology to deliver meaningful financial rewards. It empowers users to turn small, consistent efforts into real growth. From paying off debts to funding life-changing purchases, COIN has proven that its ecosystem is more than just a way to earn—it's a tool for transformation.

The combination of COIN's unique earning methods and the timing of XYO's price surge enabled ordinary people—COIN users—to achieve extraordinary results.

Unlike anything else on the market, COIN gave users a way to earn crypto while integrating seamlessly into their daily lives. As XYO's value soared, COIN users weren't just earning—they were watching their efforts grow into tangible, life-changing rewards.

This perfect alignment of opportunity and timing exemplifies COIN's mission: to empower users to take small steps today that create big opportunities for tomorrow.

*"Back in 2021, I earned enough XYO from the COIN app to put a \$30,000 down payment on our dream home! With the recent uptick, I've been selling smartly and buying back lower to grow my XYO stash. I'm excited for what's next!"*

# A Long-Time Advocate

For Jesse, COIN has been more than just a source of financial growth—it's been a journey of belief and consistency. As one of the early adopters, he has witnessed COIN and XYO's evolution and shared his enthusiasm with others. With holdings now worth over \$10,000, his dedication has paid off in a big way.

"I have been in the project since the very early days because I love the mission and am super intrigued by DePin (before it was even a thing!). I have done a combo of sell and HODL over time but decided to just participate as a Pro User and HODL for the last two years. The recent price increase has ballooned my holdings to over \$10,000, which is amazing! I share the XYO story with every driver I know (and I know a lot of them at UPS)."

"I'm holding on to 610,000 XYO. With the price jump, its value went from about \$3,000 to about \$24,000 at times. I'm still holding, and I believe it will go much higher."  
– Justin

For Dylan, the COIN app offered an unexpected windfall just in time for the holidays. What started as a casual way to earn a little extra turned into a \$700 bonus during XYO's price surge, proving how COIN rewards can create meaningful opportunities for users when they need it most.

"I collect COIN while playing new iOS games and was never really expecting much from it. After a while, I started to build up a bit and was excited when I started reaching ~\$70. With the recent increase, it pushed up to ~\$700! This has given me some unexpected pocket money just in time for Christmas... that is, if I choose to sell."

– Dylan

# Crypto as a Lifeline

For April, COIN was more than an app—it was a lifeline during a time of financial hardship. Redeeming her COIN tokens for XYO allowed her to pay rent when she had no other options, showing how COIN can create stability and hope for its users.

"I redeemed my first 10,000 COIN for XYO and after only six months, I was able to take the profit portion and use it to cover my rent payment for a month! This couldn't have happened at a more dire time in my life because, without that money, I don't know how I would have made it by."  
– April

The recent price increase allowed him to fund hobbies and create special moments for his family, proving that COIN offers more than just financial rewards—it provides opportunities for personal growth and joy.

"I found the COIN app around 2019/2020. As a truck driver traveling all over Europe, it gave me some nice bonuses. I usually hold XYO as a piggy bank for my hobbies, selling when the price is right. With the recent price increase, I was able to buy all the gear for my new reef tank and a nice Christmas gift for my wife and daughter."

All the while having fun Geomining and exploring, playing games, and watching that precious COIN accumulate as I walk, drive, ride bikes, or sit idle and earn with Audio Ads playing. I'd most certainly call that a success!"
